EDUCATION

2010 - 2013
INSA DE LYON (FRANCE)

- Master of Engineering Computer Science

2012 - 2014
UNICAMP (BRAZIL)

- Computer Engineering
- GPA: 3.2 / 4.0

SKILLS

- Go / API / Microservices
- Python / Data / AI
- Design Data-Intensive apps
- Cloud / DevOps
- Conference speaker & organizer
- Effective Communication
- Critical Thinking

LANGUAGES

- English (Fluent)
- French (Fluent)
- Portuguese (Fluent)
- Spanish (Intermediate)

PROFILE

Go/Python Software Engineer with deep expertise in building secure, high-performance applications that handle large volumes of data. I bring over 4 years of on-call production experience, giving me a practical, reliability-first approach to engineering. I've been an active Claude Code user since 2024, integrating AI into my development workflow to boost productivity and code quality. I regularly share my knowledge and experience through conference talks.

WORK EXPERIENCE

Eudonet 2026 - Current
Senior Software Engineer
- C# Reviewer, Claude/Hermes coder using Matt Pocock skills and Herdr

Sopht 2024 - 2025
Senior Software Engineer
- AI Company Seminar, Full vibe-code project (Sonnet 3.7), Spring Stack

OVHcloud 2019 - 2024
Software Engineer
- Python monitoring & automatic repair for the Data Ingestion pipelines (CDC). +110 Data pipelines. Go Ambari Alert Forwarder to OpsGenie.
- Datalake Baremetal to Public Cloud migration (Terraform+Ansible). 3K+ employees (+330TB of data, +42K tables, 85 data projects)
- Data industrialization, participation in performance & security audits.
- CIO Technical architect volunteer, EMEA Startup mentor since 2023.

Amadeus 2017 - 2019
Consultant for Altran
- Datalake Open-Premise migration to Google Cloud Platform (GCP) 17K+ employees (+200 nodes, 10k CPU, 84 TB of RAM, 13 PB of Data)
- Implement Backup & Restore Kerberos to reduce this SPOF risk.
- Datalake migration from VMs to RedHat OpenShift Kubernetes.
- Migrate Puppet to Ansible, robust and resilient with Molecule tests.

CNRS / LIRIS 2015- 2017
PhD Fellowship
- Developed a real-time analyzer performing sentiment and topic analysis on 1.78 billion tweets in 48 hours during the Trump-Clinton debates, auto-scaled across 4 clouds (AWS, GCP, OVH, Azure)
